PROJECTS

Udemy Clone
HTML | CSS | JavaScript | React
- Developed a fully functional Udemy clone using React, replicating key features of an online learning platform, including course listings.
- Built reusable and modular components such as course cards, navigation menus, and instructor dashboards to maintain a clean and efficient codebase.
- Focused on optimizing performance with lazy loading and code splitting for improved user experience.

Greenden Clone
HTML | TailWind CSS | JavaScript
- Developed a responsive clone of Greenden, a modern website for sustainable products, focusing on replicating its clean and minimalist design using Tailwind CSS.
- Created fully responsive web pages, ensuring seamless navigation across various devices such as desktops, tablets, and smartphones.
- Enhanced user engagement by adding hover effects, animations, and a smooth scrolling experience.

Stopwatch Application
HTML | TailWind CSS | JavaScript
- Built a fully functional stopwatch application using JavaScript, HTML, CSS, and styled it with Tailwind CSS for a modern, responsive design.
- Implemented key features such as start, stop, and reset functionality, using JavaScript to manage time intervals and DOM manipulation.
- Deployed the project on GitHub Pages, providing easy access for users and showcasing the project for web development portfolios.
